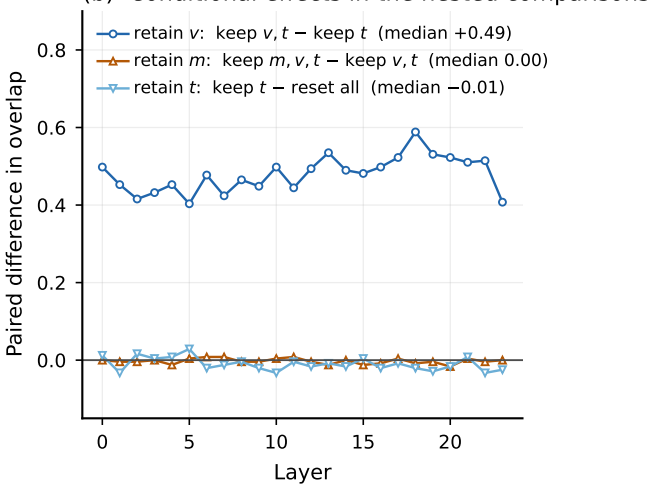
(a) Which neurons receive the change
keep m, v, t
keep v, t
keep t
reset all
random set (0.05)
Overlap: top-change and new-task-selective 5%
Layer



(b) Conditional effects in the nested comparisons
retain v: keep v, t − keep t (median +0.49)
retain m: keep m, v, t − keep v, t (median 0.00)
retain t: keep t − reset all (median −0.01)
Paired difference in overlap
